Dear Trophy Club Family Medicine Patients,

We would like to take a moment to update you on the mask requirements at our clinic. As you are aware, Governor Abbott has announced the removal of all state imposed COVID-19 mitigation restrictions as of Wednesday, March 10 including the use of masks in public places.

The Texas Medical Association along with the CDC (Centers for Disease Control) continue to stress the importance of wearing masks, practicing social distancing, washing hands frequently, and receiving vaccine when eligible. We will continue to practice these guidelines and recommendations. **Masks will still be required in our facility.**

We want you to remain confident that we will continue to do our very best to keep you, your loved ones and our team as safe as possible. We will continue to implement all of the Covid-19 protocols, such as limiting the amount of people in our office and staying consistent with cleaning and disinfecting the office as well.

We hope all of our patients join us in the responsibility of keeping everyone healthy and safe. If you have any questions or concerns please feel free to contact the office.

Respectfully,

Trophy Club Family Medicine
